

D&D CHARACTER BALANCE TESTER

FRIEND TEST QUICKSTART

One installer. One sample test. One D&D Beyond import path. Write down anything that feels confusing.

155 MB
installer

1

Double-click setup

Open **DND-Character-Balance-Tester-Friend-Test-Setup.exe**.

2

Pass Windows warning

Click **More info**, then **Run anyway**.

3

Load sample

Click **Load sample** so you can test without D&D Beyond first.

4

Begin simulation

Try the playable encounter and batch odds.

Windows may say Unknown Publisher because this is a self-signed personal test build. That is expected for now.

Start with the sample character before importing anything.

What to check first

Name

Class

Level

HP

AC

Weapons

Spells

Skills

Missing sheet data is useful feedback, especially for caster-heavy characters.

D&D Beyond Import Path

PUBLIC SHEET REQUIRED

Use the green-highlighted import box in the app.

Import Setup

Public

Set the D&D Beyond character to Public first.

Copy

Click
Copy import bookmark code

Bookmark

Paste it into a bookmark URL field.

Do not paste the import code into the address bar.

1

Open bookmarks

In Brave, Chrome, or Edge, press **Ctrl + Shift + O**.

2

Add bookmark

Name it **Send to D&D Simulator**.

3

Paste URL

Paste the copied code into the bookmark's **URL** box.

4

Click bookmark

Open the D&D Beyond sheet, then click the bookmark.

Play, Then Report What Felt Wrong

TESTER NOTES MATTER

Playable mode should feel clear enough to replay, not just calculate results.

Best feedback

Where did you get stuck?

Which button wording was confusing?

Were weapons, spells, armor, and skills correct?

Did the playable encounter feel fun enough?

What did you expect that did not happen?

It does not install

Node.js, npm, Next.js, React, Git, MySQL, browser extensions, D&D Beyond credentials, services, or drivers.

It includes

Electron, Chromium, the built app files, the local import helper, and starter SRD monster data.
